

Kairavi Malik

B.Tech Artificial Intelligence Student | AI & Data Science Enthusiast

About Me

Artificial Intelligence undergraduate passionate about Generative AI, Machine Learning, Data Science, and software development. Experienced in working with RAG systems, API integrations, Git/GitHub workflows, and AI-powered applications.

Education

University of Petroleum and Energy Studies (UPES)

B.Tech in Artificial Intelligence

Indian Institute of Technology Madras

BS in Data Science (Ongoing)

Technical Skills

- Python, Java, C
- Generative AI
- Large Language Models (LLMs)
- Retrieval-Augmented Generation (RAG)
- Prompt Engineering
- Embeddings & Similarity Search
- Git & GitHub
- DBMS & SQL
- Data Structures & Algorithms
- Computer Networks

Experience

Data Science Intern - Sems Welfare Foundation

Worked on image classification model, dataset cleaning, preprocessing, and Excel-based analysis.

AI & Technology Intern - NeetiQ (Ongoing)

Learning RAG architecture, embeddings, chunking strategies, and vector databases.

AI & Emerging Technologies Intern - IBM SkillsBuild (Ongoing)

4-week internship focused on AI, emerging technologies, and professional development.

Projects

- **AI Study Assistant:** Built using Gemini API and document processing for Q&A systems.
- **Image Classification Model:** ML project developed during internship.
- **Cinematica DB:** Movie & TV show database system.
- **ShopEase:** E-commerce website platform.
- **Personal Portfolio Website:** Showcases skills, projects, and achievements.

Achievements

- Winner - Paradox 2025
- Top 5 Team - IITM Paradox 2025
- Participant - UDBHAV Hackathon 2025

Languages

English, Hindi
